SKILLS

Programming: Python (10+ years exp.), MATLAB (9+ years exp.), C/C++ (9+ years exp.), JAVA (9+ years exp.) Software and Libraries: PyTorch, OpenCV, ROS, Mujoco, TensorFlow, Git, Gazebo, Point Cloud Library, Docker, Ray, Isaac **EXPERIENCE**

Oregon State University Graduate Research Assistant, Prof. Alan Fern

Jun '21 - Present

- Uncertainty Quantification in Vision Language Models Applied Conformal Prediction for calibrated evaluation of LLM model output uncertainty. Pytorch, VLM, Large Language Models (LLM), Retrieval Augmented Generation (RAG)
- Sim2Real RL for Bipedal Robots Developed an RL controller for generating gaits to reach goal foot locations.
 - Transferred to the real world from simulation via randomizing the parameters of the simulation.
 - Trained a model to accurately check if a footstep is feasible. Published at [ICRA 2022]. Pytorch, Mujoco
- Multi-Task Learning Developed a model for Grape Cold-Hardiness that outperforms the state-of-the-art scientific model with just thirty seasons of data per cultivar.
 - Our work is deployed on [AgWeatherNet] which is used monthly by 14K subscribers.
 - [ML Journal] (Under Review), [AIAFS 2023] (Accepted), [IAAI 2023] (Accepted). Pytorch, RNNs
- Probabilistic Forecasting Gaussian Processes for Cold-Hardiness Forecasting, deployed on AgWeathernet.
- Al Safety Proposed a Formal Criterion for avoiding Side Effects, demonstrated its effectiveness on gridworlds.
 - Published at [NeurIPS ML Safety Workshop 2022]. Pytorch, Al Safety Gridworlds
- Offline RL Studied effect of different farmer strategies across different farms (without access to a simulator).
 - Trained a Multi-Dynamics World Model and showed that it incurs negative interference under limited data, undermining generalization. World Models, Crop Simulators, Model-based Off-Policy Evaluation
- Teaching Systems Dynamics and Control, Fall 2021 with weekly office hours and evaluation duties.

Panasonic Singapore Al Engineer, Technology Innovation Team

Jan '19 - Jan '21

- Bayesian Optimization for Material Design Reduced number of iterations from 20 (2 years) to 1 (2 weeks) to obtain a material composition which meets design criteria with just 30 samples. Pytorch, Gaussian Processes
- Edge Deployment of Deep Learning Models Successfully deployed vision models on dated Android TV boxes with lower computational resources, achieving a 30 FPS. Pytorch, OpenCV, TensorFlow, Android 6.0, ONNX
- Real-time Multi-Object Tracking Developed a 50+ FPS tracker using Kalman Filters for state estimation and Hungarian algorithm for data association. Tracker deployed in a shop with 1000 daily visits. OpenCV, C++
- Deep Learning for Gaze Estimation Trained a robust gaze prediction model entirely on synthetic images, fine-tuned on real images and successfully deployed on a beta trial in a shop with 1000 daily visits. Unity, Pytorch

National University of Singapore Research Staff, Prof. David Hsu

Jan '17 – Jun '18

- Autonomous Driving in a Crowd by Learning from Tree Search Published at [RSS 2019]. Pytorch, C++, Unity
- Developed a feature rich Visualization Tool to debug QMDPNet, an approx. POMDP Solver. TensorFlow, Tkinter
- Developed a **Robust Position and Velocity Controller** for the Fetch Robot for indoor navigation. ROS, C++

Ducere Technologies, India Computer Vision Engineer

- Developed a Low Cost 3D LiDAR system using Teraranger One ToF sensor on a pan-tilt unit. Point Cloud Library IIIT Hyderabad, India Research Staff, Prof. Madhava Krishna Apr '17- Jul '17, Jun '15 - Jul '16
 - Learning based approach for Visual Servoing Published at [ICRA 2017]. Caffe, OpenRAVE, MATLAB, Drones
 - Developed a robust system for Traffic Sign Detection, Recognition and Tracking as part of a driverless car challenge for Indian automobile manufacturing company - Mahindra. Deployed and tested on a car. OpenCV, C++

COURSE PROJECTS

- Avoiding Side Effects in Conway's Game of Life Environments via Multi-Task Learning [Slides]
- Distributed DQN Q-Learning with Ray Framework via CPU parallelism for data collection and updates [Code]
- Offline-RL for Bipedal Robots via Behavior Cloning and Actor-Critic Learning [Report]
- Studying Robustness of Semi-supervised Visual Features to Adversarial Attacks [Report]
- Monte Carlo Dropout for Efficient RL Exploration in Continuous Maze Environments [Report]

EDUCATION

Oregon State University

Corvallis, OR

M.S in Artificial Intelligence | GPA: 3.89/4.0 Mar '21 - Dec '24 Courses: Reinforcement Learning, Deep Learning, Algorithms, Optimization, Probabilistic Graphical Models

Research: Multi-Task Learning, Bipedal Robots, Al Safety, Forecasting, Offline RL Birla Institute of Technology and Science, Pilani

'11- '16

B.E in Electrical & Electronics Engineering, M.Sc in Biological Sciences (Dual Major)

EXTRACURRICULAR

Musician [Youtube], Amateur Triathlete [Certificate]

India
